

Sparkly
SNOWFLAKES

A twist on the usual snowflake activity.

Cutting out snowflakes can be fun, but fiddly, and it doesn't always work! Print these snowflake templates out, then give each child some PVA glue and a paintbrush or glue spreader.

Instruct the children to cover the snowflake in PVA glue, being mindful to stay inside the blue section. Then give each group a tray, or each colour of glitter a tray (so it can be collected back up after) and have children shake glitter over their snowflake, making sure they shake any excess glitter off into the trays.

You may want to print these onto card to make them more solid, and you may also want to get them to cut them out first (if they're going to cut them out) as it will be trickier once they're covered in glitter!
